

GNAT2-guanine nucleotide binding protein (G protein), alpha transducing activity polypeptide 2 Gene
Reference: PTXBC000233

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	ACHM4; GNATC; guanine nucleotide-binding protein G(t) subunit alpha-2; cone-type transducin alpha subunit; guanine nucleotide binding protein (G protein), alpha transducing activity polypeptide 2; transducin alpha-2 chain; transducin, cone-specific, alpha		

For research use only.

GENE DESCRIPTION	guanine nucleotide binding protein (G protein), alpha transducing activity polypeptide 2
GENE ID	2780
ORIGIN SPECIES	Human
ACCESSIONS	BC000233
VECTOR	pDONR223
NCBI SYMBOL	GNAT2
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
