

MGC3207-translation initiation factor eIF-2B subunit alpha/beta/delta-like protein Gene

Reference: PTXBC001703

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	M1Pi; MRDI; MTNA; Ypr118w; methylthioribose-1-phosphate isomerase; MTR-1-P isomerase; S-methyl-5-thioribose-1-phosphate isomerase 1; mediator of RhoA-dependent invasion; methylthioribose-1-phosphate isomerase homolog; translation initiation factor eIF-2B		

For research use only.

GENE DESCRIPTION	translation initiation factor eIF-2B subunit alpha/beta/delta-like protein
GENE ID	84245
ORIGIN SPECIES	Human
ACCESSIONS	BC001703
VECTOR	pDONR223
NCBI SYMBOL	MGC3207
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
