

## FAH-fumarylacetoacetate hydrolase (fumarylacetoacetase) Gene

Reference: PTXBC002527

|                |                                                                                                                               |                     |                |
|----------------|-------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                           | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                          | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | fumarylacetoacetase; FAA; beta-diketonase; fumarylacetoacetate hydrolase (fumarylacetoacetase); fumarylacetoacetate hydrolase |                     |                |

**For research use only.**

|                         |                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------|
| <b>GENE DESCRIPTION</b> | fumarylacetoacetate hydrolase (fumarylacetoacetase)                                              |
| <b>GENE ID</b>          | 2184                                                                                             |
| <b>ORIGIN SPECIES</b>   | Human                                                                                            |
| <b>ACCESSIONS</b>       | BC002527                                                                                         |
| <b>VECTOR</b>           | pDONR223                                                                                         |
| <b>NCBI SYMBOL</b>      | FAH                                                                                              |
| <b>LENGTH</b>           | ProteoGenix bp                                                                                   |
| <b>SEQUENCE PRIMERS</b> | Forward primer M13R (5'→3'): GTAAACGACGGCCAGT<br>Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |
