Mgmas-mitochondria-associated protein involved in granulocyte-macrophage colony-stimulating factor signal transduction Gene

Reference: PTXBC005024

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	magmas-like protein; MAGMAS; CGI-136; SMDMDM; TIM16; TIMM16; mitochondrial import inner membrane translocase subunit TIM16; mitochondria associated protein involved in granulocyte macrophage colony stimulating factor signal transduction; mitochondria-asso		

For research use only.

GENE DESCRIPTION	mitochondria-associated protein involved in granulocyte-macrophage colony-stimulating factor signal transduction
GENE ID	51025
ORIGIN SPECIES	Human
ACCESSIONS	BC005024
VECTOR	pDONR223
NCBI SYMBOL	Magmas
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
