AKR1A1-aldo-keto reductase family 1, member A1 (aldehyde reductase) Gene

Reference: PTXBC005394

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	ALDR1; ALR; ARM; DD3; HEL-S-6; alcohol dehydrogenase [NADP(+)]; HEL-S-165mP; alcohol dehydrogenase; dihydrodiol dehydrogenase 3; epididymis secretory protein Li 6; epididymis secretory sperm binding protein Li 165mP; aldo-keto reductase family 1 member A1		

For research use only.

GENE DESCRIPTION	aldo-keto reductase family 1, member A1 (aldehyde reductase)
GENE ID	10327
ORIGIN SPECIES	Human
ACCESSIONS	BC005394
VECTOR	pDONR223
NCBI SYMBOL	AKR1A1
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
