

EIF3G-eukaryotic translation initiation factor 3, subunit G Gene

Reference: PTXBC008469

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	EIF3-P42; EIF3S4; eIF3-delta; eIF3-p44; eukaryotic translation initiation factor 3 subunit G; eukaryotic translation initiation factor 3 RNA-binding subunit; eukaryotic translation initiation factor 3 subunit p42; eukaryotic translation initiation factor		

For research use only.

GENE DESCRIPTION	eukaryotic translation initiation factor 3, subunit G
GENE ID	8666
ORIGIN SPECIES	Human
ACCESSIONS	BC008469
VECTOR	pDONR223
NCBI SYMBOL	EIF3G
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
