ISG20-interferon stimulated exonuclease gene 20kDa Gene

Reference: PTXBC016341

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	promyelocytic leukemia nuclear body-associated protein ISG20; CD25; HEM45; interferon-stimulated gene 20 kDa protein; estrogen-regulated transcript 45 protein; interferon stimulated exonuclease gene 20kDa; interferon stimulated exonuclease gene 20		

For research use only.

GENE DESCRIPTION	interferon stimulated exonuclease gene 20kDa
GENE ID	3669
ORIGIN SPECIES	Human
ACCESSIONS	BC016341
VECTOR	pDONR223
NCBI SYMBOL	ISG20
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
