GDAP1-ganglioside-induced differentiation-associated protein 1 Gene

Reference: PTXBC024939

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	CMT4; CMT4A; CMTR1A; ganglioside-induced differentiation-associated protein 1; Charcot-Marie-Tooth neuropathy 4A; ganglioside induced differentiation associated protein 1		

For research use only.

GENE DESCRIPTION	ganglioside-induced differentiation-associated protein 1
GENE ID	54332
ORIGIN SPECIES	Human
ACCESSIONS	BC024939
VECTOR	pDONR223
NCBI SYMBOL	GDAP1
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)

[illegible]
