

## FAP-fibroblast activation protein, alpha Gene

Reference: PTXBC026250

|                |                                                                                                                                                                                                                                                                 |                     |                |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                                                                                                                                                             | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                                                                                                                                                            | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | gelatine degradation protease FAP; dipeptidyl peptidase FAP; prolyl endopeptidase FAP; DPPIV; FAPA; FAPalpha; SIMP; 170 kDa melanoma membrane-bound gelatinase; integral membrane serine protease; post-proline cleaving enzyme; seprase; surface-expressed pro |                     |                |
