

## ZYG11B-zyg-11 homolog B (C. elegans) Gene

Reference: PTXBC029832

|                |                                                                                                 |                     |                |
|----------------|-------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                             | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                            | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | ZYG11; protein zyg-11 homolog B; zyg-11 homolog B; zyg-11 family member B, cell cycle regulator |                     |                |

**For research use only.**

|                         |                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------|
| <b>GENE DESCRIPTION</b> | zyg-11 homolog B (C. elegans)                                                                    |
| <b>GENE ID</b>          | 79699                                                                                            |
| <b>ORIGIN SPECIES</b>   | Human                                                                                            |
| <b>ACCESSIONS</b>       | BC029832                                                                                         |
| <b>VECTOR</b>           | pDONR223                                                                                         |
| <b>NCBI SYMBOL</b>      | ZYG11B                                                                                           |
| <b>LENGTH</b>           | ProteoGenix bp                                                                                   |
| <b>SEQUENCE PRIMERS</b> | Forward primer M13R (5'→3'): GTAAACGACGGCCAGT<br>Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |

### ORF (Only for reference, product provided without STOP codon)
