

MON2-MON2 homolog (*S. cerevisiae*) Gene

Reference: PTXBC141817

| | | | |
|----------------|---|---------------------|----------------|
| Product type: | DNA | Storage Condition: | -20°C |
| Size/Quantity: | 2 ug | Delivery Condition: | +4°C, Blue Ice |
| Synonyms | MON2 homolog, regulator of endosome-to-Golgi trafficking; MON2 regulator of endosome-to-Golgi trafficking; protein MON2 homolog | | |

For research use only.

| | |
|-------------------------|--|
| GENE DESCRIPTION | MON2 homolog (<i>S. cerevisiae</i>) |
| GENE ID | 23041 |
| ORIGIN SPECIES | Human |
| ACCESSIONS | BC141817 |
| VECTOR | pDONR223 |
| NCBI SYMBOL | MON2 |
| LENGTH | Proteogenix bp |
| SEQUENCE PRIMERS | Forward primer M13R (5'→3'): GTAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |

ORF (Only for reference, product provided without STOP codon)
